KVP offers a Complete Wrapping and Packaging Service

FOR the service of all who need it, KVP Papers are cut and packaged in many different forms. Besides rolls, sealed packages, bales, cartons, tablets, etc., they are supplied as butter, oleo and shortening wrappers, meat, ice cream wrappers, poultry wrappers, tub and carton liners, milk can tops, and in many other ways.

On the pages that follow are illustrated and described the most frequently demanded of these wrappers and liners. There are others, designed to meet a definite need and supply a specialized market. Wherever there is a demand for wrappers KVP is glad to meet that demand.

A Complete Laboratory to Work Out Your Packaging Problems

An extensive laboratory is maintained in which all new wrapper problems which arise are worked out by expert chemists. Here the exact condition which your products meet can be duplicated very closely, and wrappers originated which will afford thorough protection, despite whatever unusual conditions may exist in your particular industry.

Put your wrapper problems up to us. We will gladly help you solve them.

Original Wrapper Designs Made for You by Skilled Artists

KVP offers an extensive list of stock wrapper designs and in addition provides a complete and valuable designing service for producing new wrappers. Skilled and capable commercial artists are regularly employed to produce these new designs and co-operate with customers in turning out new wrappers of distinction and selling power.

These designers understand food merchandising and shipping, and can provide valuable help to everyone who needs wrappers on which advertising appears.

Extensive Printing Facilities at Your Service

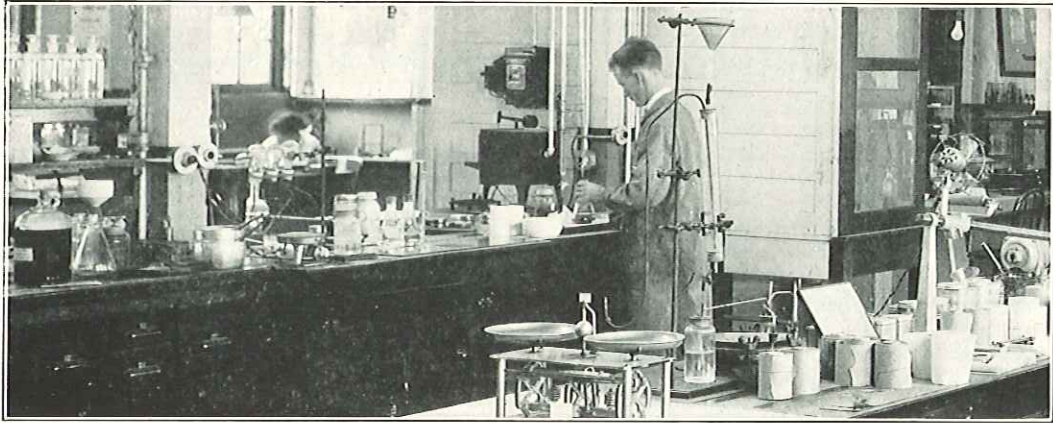

KVP maintains an extensive printing plant, with presses and full equipment, so that users' wrappers can be produced complete. This work is done at a nominal cost.

Where necessary, the printing is carried out with special water and brine-proof ink, so that wrappers can be used around foods containing moisture, without any chance of streaking wrappers, discoloring or tainting food.

Let Us Help You With Your Problems

KVP welcomes every opportunity to be of assistance in planning and producing new wrappers. Feel free to call on us for advice or suggestions at any time. Our experts will gladly help you work out your problems and choose the right wrappers.

Food packaging problems of all sorts are solved in the KVP Laboratories. If you wish to receive constructive suggestions based on laboratory experimental tests, just put your problem up to our staff of experts. No obligation.

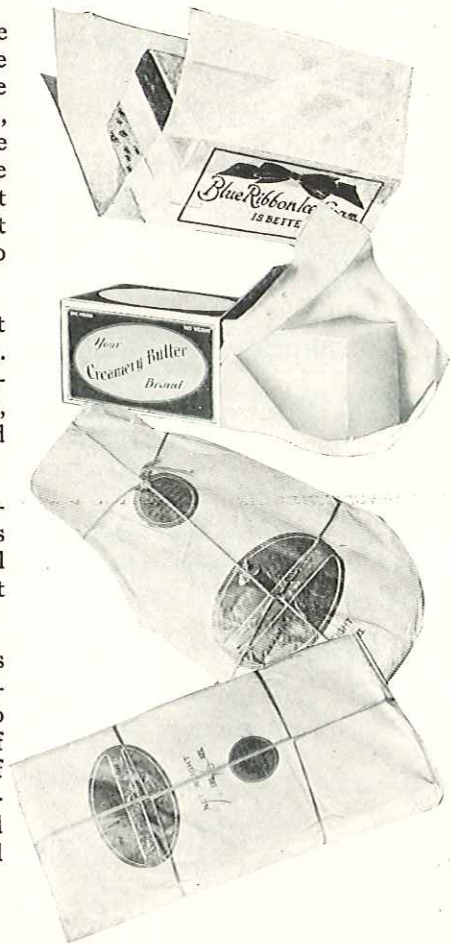

KVP Genuine Vegetable Parchment

PERISHABLE products formerly could be sold only in a limited field close to the point of manufacture. Today, these same products are being shipped long distances, held on retailers' shelves for a considerable length of time, and delivered to the ultimate consumer after a much longer interval. Yet the user received these products in as perfect condition as when they left the factory, due to the use of KVP protective wrappers.

Food shippers are constantly branching out to more distant markets to expand their sales. This is continually increasing the interval between production and consumption of food, and makes essential a wrapper that keeps food fresh and palatable until eaten.

The even keener competition between food-stuff producers likewise makes good wrappers and containers highly important, for the final test is the goodness of the food when it reaches the table.

Lastly, the public itself, which chooses its foods on a basis of strict comparison, has elevated its standards of living and of health to heights never before known. This in itself makes it essential from the standpoint of profits and service, for food shippers and producers to protect the purity, freshness and appetizing qualities of their products until served.

60-lb. Basis Parchment

This new sheet is made in two sizes:

29 x 42 and 24 x 36

although other sizes can be manufactured in quantities of 5,000 lbs. or more.

The sheet can be furnished glycerine treated, machine trimmed, ream sealed and cased at a slight additional cost.

Egyptian Parchment

This sheet is particularly adapted for the Greeting Card manufacturers for announcements or similar purposes.

The basis weight ranges about 80 lbs. per 500 sheets 24 x 36 and the standard sizes are:

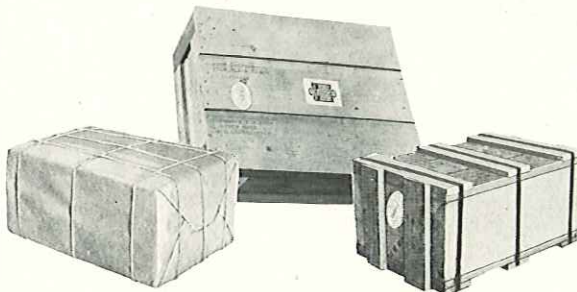

29 x 42 and 24 x 36

although other sizes can be furnished in quantities of 5,000 lbs. or more.

Creped Parchment Barrel Covers

"These Barrel Covers are usually cut to size 24 x 24. A Creped Parchment sheet is picked up at the same time as the burlap barrel cover and both are fastened at the same time over the heads of barrels. This special sheet is not affected by moisture so it does not go to pieces or allow dirt to seep in. The paper is porous giving the products a chance to breathe. Creped Parchment is also being used by some packers on the top and bottom tierces of Sweet Pickled meats placed in storage, in this way eliminating the use of muslin barrel covers and showing a considerable saving per tierce in the cost of the liner. Creped Parchment can also be furnished in other sizes and basis weights if desired."

How KVP Parchment is Packed for Shipment

Bundles

For the convenience of customers who cannot handle regular 500 lb. shipping bales, any of the smaller cut sizes up to and including 12 x 18"—20 lb., 25 lb., 30 lb., 40 lb. or 50 lb. basis Parchment stock can be furnished in 50 lb. bundles. Where storing space is limited, and for Jobbers whose trade purchases in small quantities, or in original packages, this is an added convenience.

The stock is weighed and arranged in convenient shape, then cardboarded top and bottom, wrapped in heavy paper and securely rope-bound for shipment. Such a bundle carries well in transit.

Cases

Parchment in cartons, cardboard boxes and other forms, is regularly packed in standardized, substantial shipping cases. These are strongly built of new lumber safely carrying up to and including 500 lbs. and insuring delivery of goods in first class condition.

Bales

KVP Genuine Vegetable Parchment being bulky, carries best in compressed Bales weighing up to and including about 500 pounds gross.

Sheets of large dimensions are first packed flat, ream-marked, banded, sealed, or put up in bulk uncounted, whichever way ordered.

Small sizes tied or sealed in packages, are also baled.

Baling is done by compressing the stock firmly between top and bottom boards, which are then securely iron-strapped.

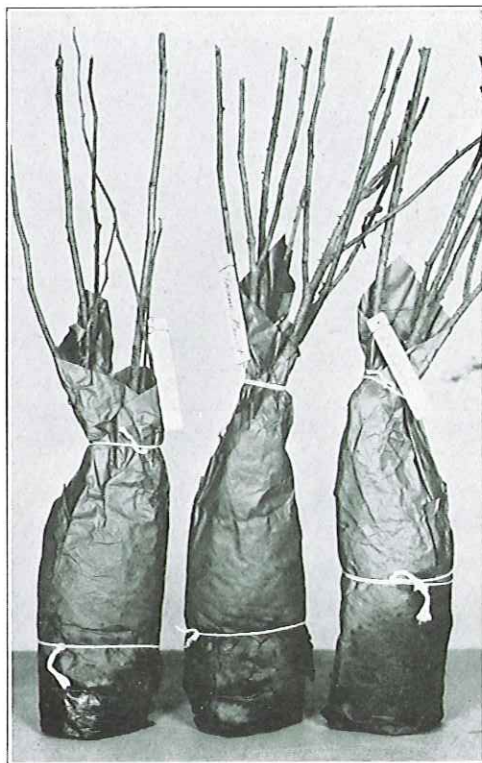

KVP Whalehide

a Whale of a Sheet for Protecting Food Products

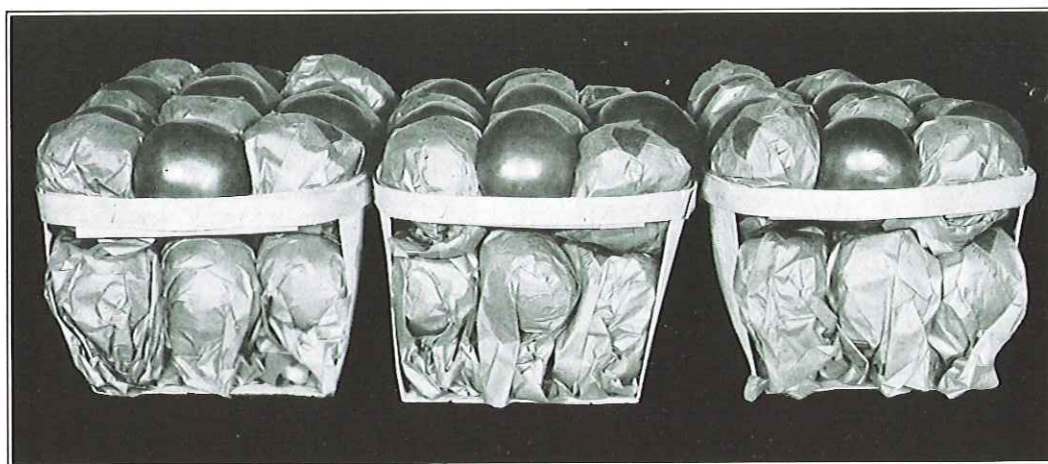

WHALEHIDE is an exclusive KVP paper which has won wide favor because of its unusual protective qualities. Its first use, several years ago, was for lining crates in which head lettuce packed with chopped ice, was shipped from the Pacific to the Atlantic Coast. Since then, its use has become general in many other industries, and it is rapidly becoming one of the most popular and best known protective wrappers on the market.

Whalehide becomes very tough when wet and thus affords thorough protection for products which themselves contain much moisture. It is not water-proof or air-proof, but on the contrary, is somewhat porous and has a desirable insulating effect.

The particular advantage of Whalehide in a nutshell is its wide range of utility as an inexpensive and safe protective wrapper. It is, in fact, the most inexpensive paper of this type, being economical enough for many uses where many papers offering not as much protective value would be prohibitive in cost. Not only does it offer protec-

tion, but it enhances the attractiveness of the package.

Grading and wrapping tomatoes in one of the largest tomato repacking plants in the country. KVP Whalehide is used exclusively.

Cut sheets of any size which will cut to advantage from basic size can be supplied.

Usual method of packing, 250 pound bales and 50 pound bundles.

Rolls, 9" diameter is standard. Any width up to 90" can be supplied. Weight of rolls, about 2 lbs. per inch of width.

MANY OTHER PECULIAR AND EXACTING REQUIREMENTS
TEMPORARY SUBSTITUTE FOR TARPAULIN

KVP Waxed Papers

- Meet Today's Demands for Extra Purity and Quality

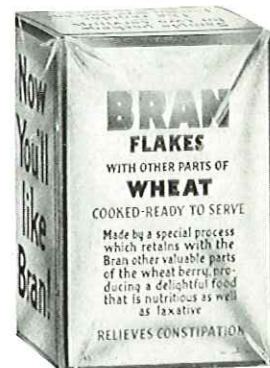

WAXED paper today is the most popular and universally used of all papers for protecting foodstuffs. It is also a paper which is called upon to render more varied and exacting service than almost any paper.

Most of the wax used on KVP Waxed Papers is imported from India, laboratory tests having proved its greater purity and resistance to heat and humidity.

The paper itself is an all-sulphite sheet of unusual strength and quality, impregnated with pure, refined, odorless paraffin. The finished paper is a clear sheet with a surface like the finest china—as clean and sanitary as the finest foodstuffs it protects.

KVP Waxed Paper embodies in the highest degree all of the virtues which have made waxed paper so popular for foodstuff protection. It is air-proof. Thus, when wrapped around foods, it prevents the escape of moisture and flavors from being absorbed by the foodstuff.

In addition to clear white waxed, KVP supplies practically all other grades, such as manila waxed, wax parchment, extra transparent waxed, dry waxed and many others.

Other Special Papers

KVP Delicatessen Paper "KEEPS GOOD FOOD GOOD"

KVP Delicatessen is a dry waxed sheet that is especially manufactured as a food protection paper for the Grocer, Butcher, Delicatessen Store, etc. It is a general utility sheet for wrapping or slapping over all moist or greasy food products. It protects food; is moistureproof. It strips well; does not go to pieces readily when wet; always is free from odor.

Standard cut sheets — rolls — tablets — wall cartons and packages.

Please refer to Section E for packing information.

KVP Sandwich Paper

For wrapping sandwiches the eggshell finish is very desirable because the sheets have a tendency to stick very slightly together, that is, they will not slide around as readily as the regular dry wax finish. In wrapping sandwiches this is a big help and our eggshell finish is proving very popular with the users of sandwich wrapping paper.

KVP Dry Waxed Paper

The use of KVP Dry Waxed Papers is increasing for Carton Lining, Ice Cream Can Squares, Sandwich Wrappers, Sevigne Bread Wrappers, Drinking Cups, and many special purposes.

Our Dry Waxed Papers are made from pure all bleached sulphite pulp and we can furnish either our regular dry wax finish or our eggshell finish. The regular finish has a mottled effect and the eggshell finish has a smooth unmottled appearance. Unless otherwise advised orders for Dry Waxed Papers in 30 lb. basis or heavier are furnished in the eggshell finish.

Prosperity Waterproofed Paper

The Distinctive Meat Wrapper

This high class sheet is the result of a repeated demand from the retail meat markets as well as the general public for a real honest-to-goodness meat wrapper.

A sheet that not only dresses up the package but is strong and waterproof. All of these requirements are included in this new sheet. The largest and most up-to-date markets in the country are rapidly adopting this paper.

Prosperity Waterproof Paper is a specially treated sheet that is strong, flexible and does

not allow moisture and juices of the meat to soak through. Excellent for delivery purposes. It will not stick to meat. Furnished in standard size rolls, uncased, or in sheets, 100 lbs. to the shipping bundle flat or soft fold. You have to see this sheet to appreciate it. Send for samples.

KVP Waxed Kraft

Raw stock is carried on the floor in rolls 72½" wide and in basis weights 25 lb., 30 lb., 35 lb., 50 lb. and 70 lb.

The minimum order we can accept is 500 pounds of one size sheet or roll in one basis weight.

The raw stock takes on about 10 lbs. of the wet wax and about 5 lbs. of the dry wax. For instance, 30 lb. basis weight raw stock will wax up to 40 lb. wet wax and 35 lb. dry wax. A one side wax will only take on about 5 lbs.

Samples and further information will be gladly furnished.

KVP Building Paper

KVP Building Paper is a sheet of exceptional strength. It has a tensile strength about twice that of ordinary Building Paper. This sheet is dipped in a solution that solidifies and is clean and not sticky. Each individual fiber in the sheet is prevented from disintegration by this moisture and air-proof solution.

The outside coating does not evaporate or crumble—for this reason KVP Building Paper is known as the insulating sheet that will outlast any building in which it is used. It insures perfect insulation against wind, rain and air. It does not absorb moisture, is odorless and will not deteriorate.

Special uses for KVP Building Paper include—

- Substitution for canvas in cement work.
- Poultry Shelters.
- Insulating railroad cars.
- Insulating small ice houses.

KVP Building Paper is made in three weights—light, medium and heavy. Each roll is 36 inches wide and contains 500 square feet or 167 lineal feet.

KVP Delicatessen Paper...

Packed in Five Convenient, Economical Ways

THE retail marketing of food products has taken a great advance in the last ten years. Retailers have become educated to the increased selling value of purveying foods in an attractive, sanitary way. No longer can the retailer hold business unless he takes the same precaution in the care and display and wrapping of bulk food products as is taken by the manufacturer in the shipment of packaged products. The result has been a tremendous increase in the amount of delicatessen foods which are sold.

There is a growing number of apartment house dwellers who are patronizing the corner grocer for a hurry-up meal. This has increased the demand for attractive wrappings and the retailers who have taken this precaution are those who are prospering.

There is no sheet of paper which more nearly meets the needs of grocery stores, meat markets, fish markets, fruit stores and others. It has a wonderful utility, being air-proof, moisture-proof, odorless and grease resistant. It is suitable for wrapping ground meat, moist vegetables, fresh fruits, lard, butter, pickles, etc. It serves many purposes, such as keeping in the freshness of any food product, retarding the loss of moisture and also preventing contamination from contact with foreign odors or tastes.

As illustrated on the following page the convenience of Delicatessen paper is increased through the many convenient ways in which it can be supplied.

Wall Cartons

Our most popular package. Specially constructed cardboard wall carton opens at top, with special lid arrangement punched to hang on a nail in convenient spot. Used by retail meat markets, groceries, delicatessen stores, etc., for wrapping or slapping over all moist and greasy food products. Each carton attractively imprinted with contents.

No. of Wall Cartons to Case	500 Sheets	250 Sheets
8 x 11.....	144	288
9 x 12.....	112	224

Tablets

8 x 11 or 9 x 12 Delicatessen is also put up in regular tablet form, padded on one end with cardboard backing and attractive printed cover.

No. of Tablets to Case	500 Sheets	250 Sheets
8 x 11.....	144	288
9 x 12.....	112	224

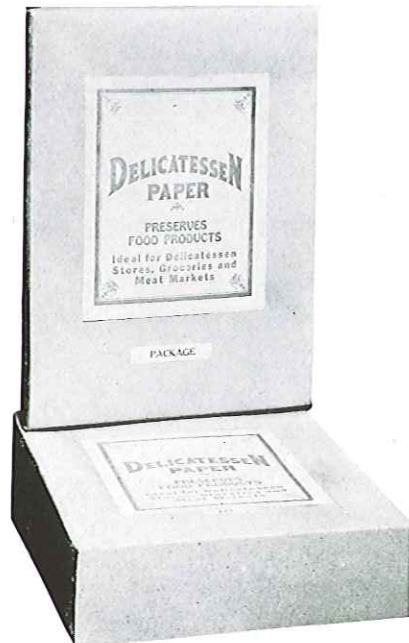

Pony Rolls

One of the most popular items in delicatessen are Pony Rolls, 5" in diameter, 9" wide, 30 lb. basis. Pony rolls also supplied in 7½" and 12" widths and 25 lb. basis. Pony rolls regularly packed 40 to case, regardless of width. Can be supplied 10 to boxboard cartons if desired.

Shipping Weights

- 7½" Pony Rolls 4¾ lbs. each empty case weighs 30 lbs.
- 9" Pony Rolls 5¾ lbs. each empty case weighs 35 lbs.
- 12" Pony Rolls 7¼ lbs. each empty case weighs 40 lbs.

Packages

Sealed packages containing 250, 500 or 1,000 sheets 8 x 11 or 9 x 12 can be supplied. Also 5, 10, 25 or 50 lb. packages.

...for the Modern Bakery

KVP Papers of Beauty and High Protective Qualities

EVERY wide-awake baker knows that business depends directly upon pleasing customers with quality baked goods. The natural tendency of these goods to dry out, become stale and lose their appetizing qualities, makes this difficult. For the customer does not judge pastries and bread upon their quality in the bakery—he judges them when they reach the table.

For this reason, it is vitally important that baked goods of all kinds be given the best possible protection during that danger period between the oven and the table. In this way alone can the baker hope to build a reputation for quality that will assure him a steady increasing volume of sales.

KVP has given thorough attention to the wrapping problems of the baker and offers a complete line of protective papers which have proven their merit through years of practical test in the country's foremost bake shops.

Everywhere KVP Papers enjoy a high reputation in the baking industry. Millions of bread wrappers both plain and printed, are shipped every week, cake wrappers, bun wrappers, cinnamon roll wrappers, doughnut and cake box liners, as well as plain and printed waxed glassine wrappers. A sheet for every need.

KVP Laboratories are glad to co-operate with bakers in working out any of their wrapping problems. Submit a recommendation on any new wrappers you have in mind. Our up-to-date Art Department will work out new designs for you in any of the standard color combinations to meet your own personal ideas, and our extensive printing facilities enables us to produce for you attractively printed wrappers that increases sales. Feel free to write us for any information or assistance.

An Art Department to Serve You

A modern Art Department consisting of a corps of up-to-date artists is maintained at all times.

Beautiful designs are continually being created in many and varied different color combinations and shades up to and including four color work.

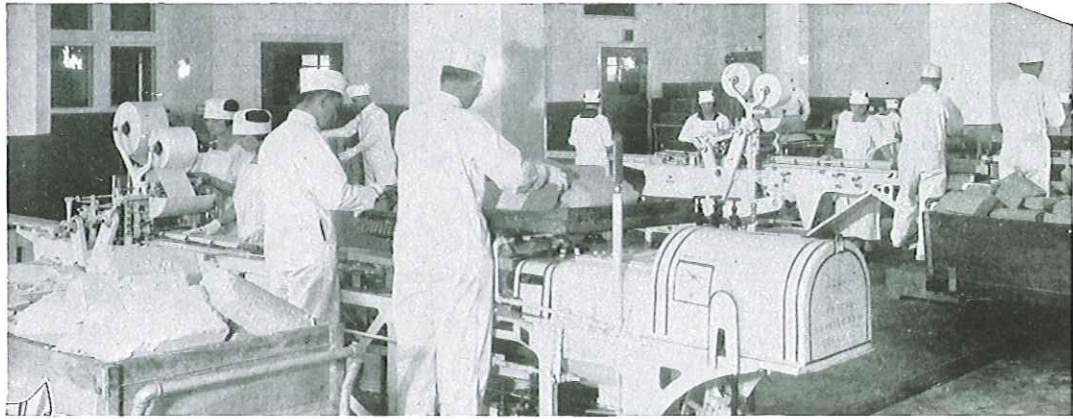

Changes are recommended, suggestions and advice are offered free of charge and with no obligation. This service is rendered as a stimulator of sales for our customers and in order to keep them fully abreast of modern designs and wrapping problems.

A new process recently developed in our Printing Department allows the use of more ink and at the same time practically eliminates offset. The design stands out as clear as a photograph and no mussy looking ink spots are noticeable.

The effect that a good looking bread wrapper has on sales is well known to the average baker. It is the ambition of our artists to make designs that will fulfill the needs and desires of the modern baker, and to work with him and carry out any ideas he may have even to the minutest detail.

Only by our own method of close co-operation can we not only fulfill the wishes of the customer but give him the benefit of years of experience in furnishing high class bread wrappers to thousands of satisfied customers, large and small, all over the United States.

KVP Protective Papers

★ a Business Building Aid
for the Modern Creamery

CREAMERY products, being by nature highly perishable and easily damaged, the finest of protective wrappers are a vital necessity. It is only good business to employ good wrappers when the reputation of the entire creamery oftentimes depends upon them.

KVP Protective Papers have won a high place for themselves throughout the creamery industry, because they supply the high degree of protection which creamery products require. Butter, milk, and other items stay fresh, wholesome and appetizing for longer periods when safeguarded in KVP Papers.

This company has made extensive study of the problems of the modern creamery and dairy. Only after thorough experimentation and practical tests have these KVP Papers for the creamery been placed on the market. In every case, however, this thorough preliminary work has proved its value by the success of KVP Papers in practical service.

Because they keep creamery products fresh, clean, sanitary and wholesome, from the farm to the creamery and from the creamery to the table, these excellent papers are today being used in large and constantly increasing quantities wherever creamery products are produced.

KVP BUTTER TUB LINERS

an excellent means of protection

KVP Pure Vegetable Parchment is the only safe liner for tubs containing butter. Being absolutely pure, odorless, tasteless and grease and oil resistant, these liners afford sure protection against damaging influences of almost every kind. Because these liners stick to the product, contents can be dumped from tub intact after which liner can be stripped off easily.

Special curve shaped parchment for lining butter or lard tubs, furnished in 30 or 40 lb. weight to fit any standard size tub. Each 1,000 liners cardboarded top and bottom and packed flat in heavy wooden shipping cases.

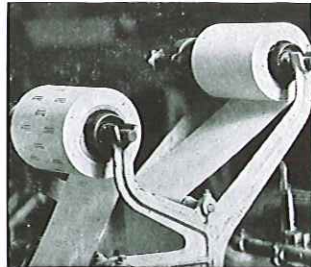

Double Wrapping of Butter

Printed or Plain — for Double Wrapping

Double wrapping of butter has been adopted by some of the largest producers in the country. This has to do with the use of a sheet of 25 lb. or 30 lb. KVP Genuine Vegetable Parchment for the first wrapping and a sheet of 30 lb. KVP Self Sealing or Dry Wax for the outside.

This method retains the original and delicate flavors much longer.

SIZES AND WEIGHTS

Capacity Pail or Tub Pounds	Diameter Top Inches	Bottom Diameter Inches	Depth of Paper in Tub Inches	Basis of Paper
10	8	6	8	30 lb.
20	11	9	9½	30 lb.
30	11½	9½	12	30 lb.
40	13	10½	12¾	30 lb.
63	14½	12	15½	30 lb.
63	14½	12	15½	40 lb.
65	14½	12	16½	30 lb.

40 and 50 lb. liners can be supplied when desired. 63 lb. tub liners and circles can be supplied complete in shipping cartons of 1,000 each.

Barrel Liners

Barrel linings, 30 x 70, 32 x 77, 50 lb. stock.
Half barrel linings, 20 x 52, 50 lb. stock.

Butter Box Liners

These can be furnished from KVP Genuine Vegetable Parchment in sheets or rolls in any size desired. Also from 30 lb., 40 lb. or 50 lb. stock.

KVP Papers for the Cheese Maker

Waxed Manilla

A high grade, all sulphite sheet regularly finished in a wet wax, in 33, 40 and 50 lb. weights. Sheets of all sizes can be supplied as well as rolls in 30", 36" 40" and 48" widths. Packed in bulk in cases.

Parchment Waxed Circles

All standard sizes from 4" or less diameter up to 24" are available in all kinds of waxed stock made by KVP. See packing section.

Parchment Wrappers

These can be furnished in any size sheet or roll from KVP Genuine Vegetable Parchment and from 25 lb., 30 lb. or 40 lb. stock. Also plain or printed with attractive individual designs in one, two or three colors.

KVP Papers . . . Provide Excellent Protection for Meats, Poultry and Fish

MEAT, poultry and fish are products which require a high degree of protection. For this reason, it is natural that packers and shippers should employ KVP Protective Papers as a means of keeping their products in the most sanitary and wholesome condition.

The meat packing industry is one of the largest users of KVP Genuine Vegetable Parchment and Waxed Papers. Fresh and cured meats of many kinds are wrapped in parchment, which protects it from spoilage and contamination, and keeps it fresh and sanitary until it reaches the market. Fish packers also use parchment in large quantities, and with this wrapping, are able to ship fish long distances with certainty that it will arrive at market in good condition.

In the retail market itself, KVP Parchment, Delicatessen Paper and Wax Paper find many uses. By wrapping with these excellent sheets, meat is preserved until it reaches the table. Moisture or grease do not cause these papers to deteriorate or come to pieces. In Delicatessen, for instances, meat can be kept for as high as 24 hours. In Genuine Vegetable Parchment, meat keeps good for far longer than that. Yet at the end of that time, the KVP wrappers strip easily from the meat, leaving no paper behind.

Sausage Wrappers

Sausage wrappers are furnished from 25 lb., 30 lb. or 40 lb. basis weight KVP Genuine Vegetable Parchment in any size desired, plain or printed.

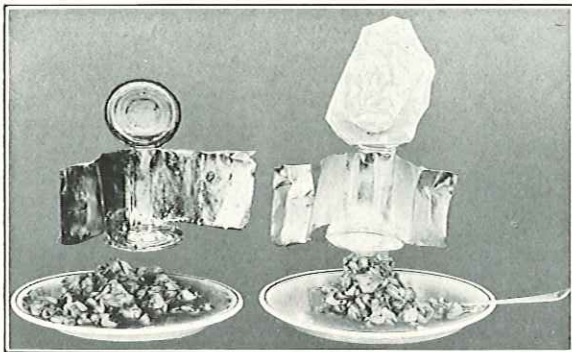

A KVP Genuine Vegetable Parchment Sausage Wrapper is greaseproof and waterproof, stronger wet than dry and is the ideal sheet for wrapping ground meats. It keeps the product fresh, clean and in excellent condition from the time it is prepared until it reaches the consumer's kitchen. The pure white appearance reflects cleanliness and quality.

Attractive designs can be made up in one, two or three colors to suit individual tastes or needs of customers or a design may be selected from the large assortment of plates on hand.

Margarine and Shortening Wrappers

Margarine and shortening wrappers are furnished from 20, 25 or 30 lb. basis weight KVP Genuine Vegetable Parchment in any size desired, plain or printed.

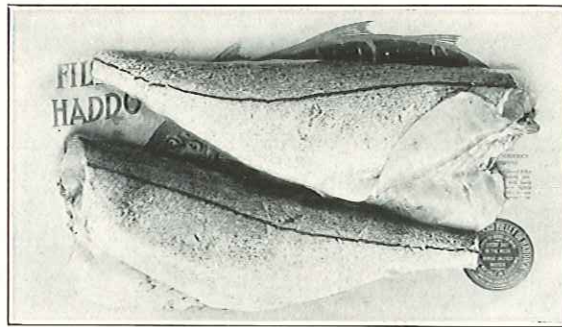

KVP Genuine Vegetable Parchment is the ideal wrapper for Margarine and Shortening, being pure white, stronger wet than dry, greaseproof and waterproof. It keeps the product clean, fresh and in excellent condition until ready for use.

Shrimp Can Liners and Circles

Circles supplied in two sizes. No. 1 for can $2\frac{1}{2}$ in. diameter. No. $1\frac{1}{2}$ for can $3\frac{1}{4}$ in. diameter. Liners, No. 1 for can $3\frac{3}{4} \times 8\frac{3}{4}$ or $3\frac{5}{8} \times 8\frac{3}{4}$. No. 2, for can $3\frac{5}{8} \times 11\frac{1}{4}$ and $3\frac{3}{4} \times 11\frac{1}{4}$.

Liners packed in sealed packages of 1,000 liners each. Circles packed in boxes of from six to ten thousand.

Fish Wrappers

KVP Genuine Vegetable Parchment 30 lb. basis weight, plain or waxed two sides, is the sheet now being used by all of the large fisheries.

This is stronger wet than dry, pure white and the very highest type of protective paper. In fact, there is not a sheet of paper manufactured today that can even compare with a pure KVP Genuine Vegetable Parchment wrapper. It affords absolute protection to the most delicate foods. Odorless, tasteless and colorless. Does not go to pieces and keeps the delicate fish fibres in the original state of preservation.

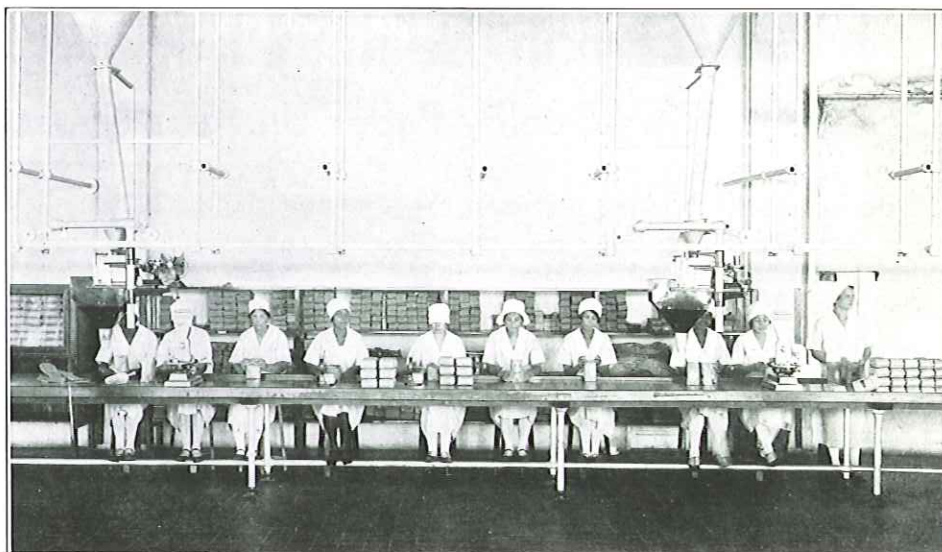

Beautiful individual designs in one, two, or three colors can be furnished at comparatively low cost.

Write in for samples and further information.

Parchment, Manila, Waxed Paper and Delicatessen in Standard Cut Sheets and Rolls

In addition to the special items listed, the meat industry finds many uses for KVP Genuine Vegetable Parchment and Waxed Papers in standard cut sheets and rolls. See packing section.

It is a real economy to purchase KVP papers in these standard cut sheets and rolls which are put up in a variety of forms to meet all special requirements.

KVP Papers

... a Valuable Help
for Every Food Manufacturer

IN virtually every food manufacturing business today, there is a need for packing and wrapping papers either of standard type or of special type to meet some peculiar conditions. Through its extensive research and laboratory work, KVP has originated wrapping and protective papers to meet these needs wherever and whenever they arise and today there is a KVP wrapper for virtually every existing requirement.

Many of these are shown in the three pages that follow. There are others being produced and new ones now being brought to perfection before being placed on the market.

Whatever your packing and wrapper needs may be, KVP can supply them. Write us and let us co-operate with you in solving your problems.

Natural Color Waxed Paper

A Paper of High Quality and Strength

Natural Color Waxed Paper is replacing Manilas and other colored papers for a great many uses because it contains no coloring matter of any description. There are certain kinds and grades of foods that demand a colorless sheet.

This sheet is manufactured from a good grade of all sulphite pulp. Strong, clean and an excellent wrapper for food products. Regularly finished with a good coating of wet or self-sealing wax.

Supplied in 33, 40 and 50 lb. basis weights.

Standard Liners and Circles

LINERS

Can	Size

Parchment Waste 4X

A very good packing material commonly considered superior to excelsior and other ordinary kinds, although not equal to Shredded Parchment. Put up in nicely packed bales, weighing 150 to 300 lbs. each and available in any quantity desired from one bale lots to carloads.

Dry Waxed Paper

in Sheets and Rolls

KVP White Dry Waxed Papers are extensively used for Carton Lining, Sandwich Wrappers, Sevigne Bread Wrappers, Drinking Cups, Mojonner Liners, Ice Cream Can Squares and many special purposes.

Our Dry Waxed Papers are made from pure all bleached sulphite pulp and we can furnish either our regular dry wax finish or our eggshell finish. The regular finish has a mottled effect and the eggshell finish has a smooth unmottled appearance. Unless otherwise advised orders for Dry Waxed Papers in 30 lb. basis or heavier are furnished in the eggshell finish.

For the Mojonner Carton Lining Machine we recommend 40 lb. basis. This sheet is heavy enough so that it works perfectly on automatic machines.

Waxed Excelsior

Used by candy houses, wholesale grocers, mail order houses, chinaware manufacturers and many other firms, requiring a high grade cushioning material or a material to fill out partial cases. Supplied in two different grades—No. 2 winder waste excelsior, plain white and manila. Put up in nicely packed bales, weighing from 150 to 300 lbs.

Parchment Waste 2X

For packing purposes there is nothing superior to Shredded Parchment Paper. There is no waste nor muss as with ordinary wood excelsior. All light, clean, fluffy stock, three-sixteenths of an inch wide, long lengths. Compressed in shipping bales of approximately 175 lbs. each, protected in heavy wrapping paper, securely tied. One trial means a steady satisfied customer.

Shredded Whalehide

Shredded Whalehide is similar to Shredded Parchment paper except that it is rolls taken from KVP Whalehide in mixed basis weights of 20 lb., 35 lb. and 50 lb. basis, mixed rolls compressed in shipping bales of approximately 175 lbs. each protected in heavy wrapping paper.

KVP Protective Papers

Help Fruit and Vegetable Growers
Expand Sales and Profits ▲▲

EXPANSION of markets and cultivation of new sales fields is one of today's biggest problems before the fruit and vegetable growers and shippers. Everywhere it is becoming necessary to reach out to new buying sections, and ship longer distances, in order to increase sales and take care of steadily expanding production.

KVP is constantly working with growers and shippers, to develop new methods of packing and wrapping produce for long distance shipment. Some of the packing methods worked out have practically revolutionized marketing practices.

You'll find your packing and wrapping requirements excellently taken care of by the extensive line of KVP protective papers. There is hardly a need for a wrapper, anywhere in the fruit and vegetable industry, which is not fully met by one of the KVP Papers. We'll be glad to recommend wrappers to meet your particular needs, and if you have any unusual conditions to be met in your business, or any new wrapping problems to be solved, our laboratories are at your service in determining the right wrapper for your job.

In the pages that follow are listed the main types of KVP Papers used in packing fruits and vegetables. The sheets shown are widely known and extensively used in the produce industry. You can employ them, knowing that many others are doing so, and finding them all that can be desired for the protection of good fruits and vegetables.

Oiled . . . Apple Wrappers

KVP Oiled Apple Wrappers are made from all Spruce Sulphite, 12 lb. basis before oiling and about 15 lb. basis after oiling. The oil is the grade recommended by the government, and the wrapper is made according to government standards in every respect. Packed in 1,000 sheet packages, wrapped first in Vegetable Parchment, then in Kraft, then put in strong wooden cases, or corrugated board containers. Can be supplied in any size from 8 x 8 up.

STANDARD SIZES AND WEIGHTS

Approximate weights per 1,000 sheets:

8 x 8.....	2.3 lb. per M
9 x 9.....	2.9 lb. per M
10 x 10.....	3.6 lb. per M
11 x 11.....	4.4 lb. per M
12 x 12.....	5.2 lb. per M

Prosperity Treated Tomato Wrappers

Silk-like in texture. A beautiful golden brown treated Prosperity sheet. Light yet strong and pliable as a silk handkerchief. An excellent protective sheet that dresses up the package at the same time. An attractive, inexpensive sheet for comparatively short shipments. A wonderful sheet for the keen competitive market. Can be furnished in any size desired.

Attractive individual designs in one, two or three colors.

Write in for liberal samples and quotations.

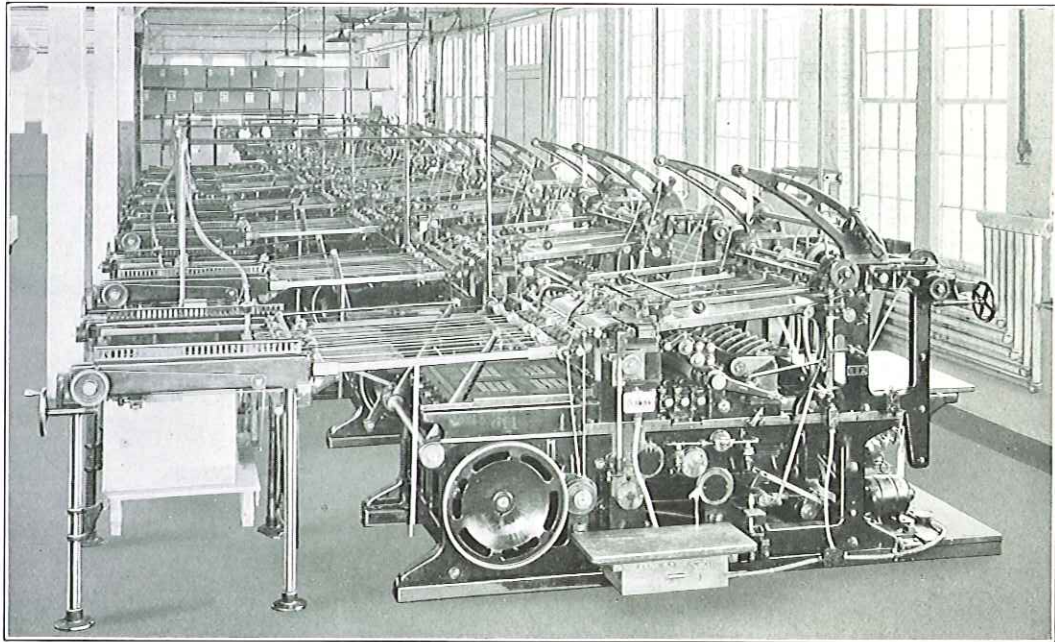

Misprint . . . Bread Wrappers . . . and Job Lots

A wrapper of high protective qualities, excellent where appearance is not essential. A variety of sizes and weights can be had, depending upon what we have available at the time you order.

Shredded Wax

Here is a cushioning material second to none. Superior to excelsior, straw, etc., as moisture does not affect it. For this reason, it is excellent for fruit and vegetable packing. Also has high insulating value. Put up in nicely packed bales of 150-300 lbs.

KVP FINE PAPERS

KVP papers are fully living up to the reputation they established from the beginning. Though comparatively young in the annals of business, they need no introduction to the printing industry, paper merchant, or office supply house.

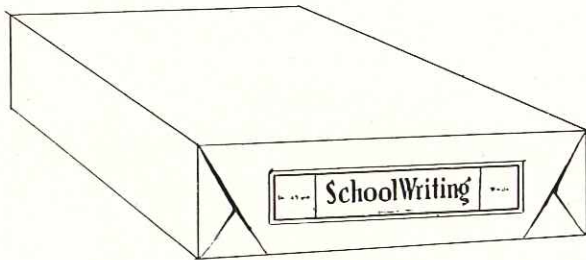

No concern in the country has expended more time, money or conscientious effort to improve the value and standards of printing and writing papers than KVP. Purchasing the best paper-making machinery money will buy, selecting raw materials of the highest grade, and maintaining an efficient and intelligent personnel at all times.

Complete lines of Bond, Writing, Ledgers and converted items including Boxed Typewriter Papers, personal stationery, second sheets and adding machine rolls.

All fine papers are tub sized. An all-sulphite tub sized sheet has proved a welcome item to the printing industry. A perfect finish with superb printing qualities.

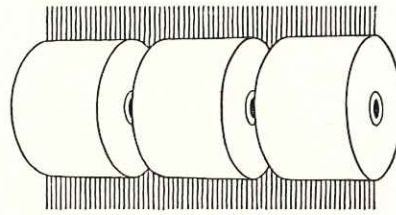

School Writing

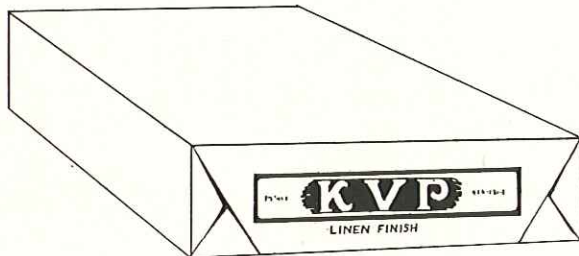

Sold to Boards of Education throughout the country for use in public schools. Also popular among Colleges and Universities. Furnished in Sub. 16, 18, 20 and 24.

KVP Adding Machine Paper

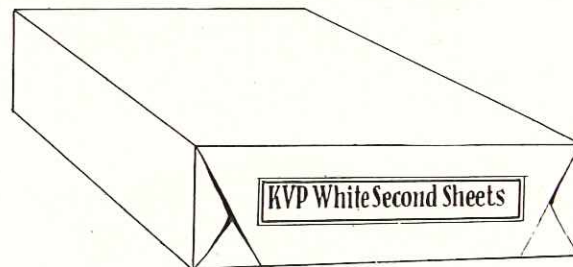

This is a favorite among accountants and other users of Adding Machine Rolls. Made from a No. 1, clean, white, lintless Bond.

Plated Papers

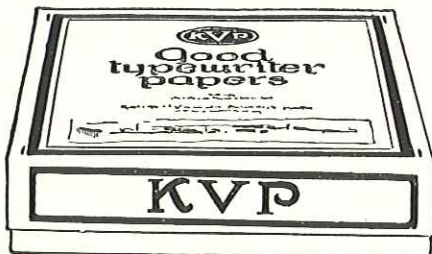

For business letterheads and personal stationery. We can supply our various grades of Bond in the Ripple as well as Linen Finish.

KVP Second Sheets

In White, Pink, Blue, Green, Buff, Canary and Goldenrod are carried in stock for immediate shipment in sizes $8 \times 10\frac{1}{2}$, $8\frac{1}{2} \times 11$, and $8\frac{1}{2} \times 13$. The $8\frac{1}{2} \times 11$ are also furnished from stock printed with the word "COPY" in red, skeleton type. This paper is light weight and noted for its strength and durability.

KVP Typewriter Paper

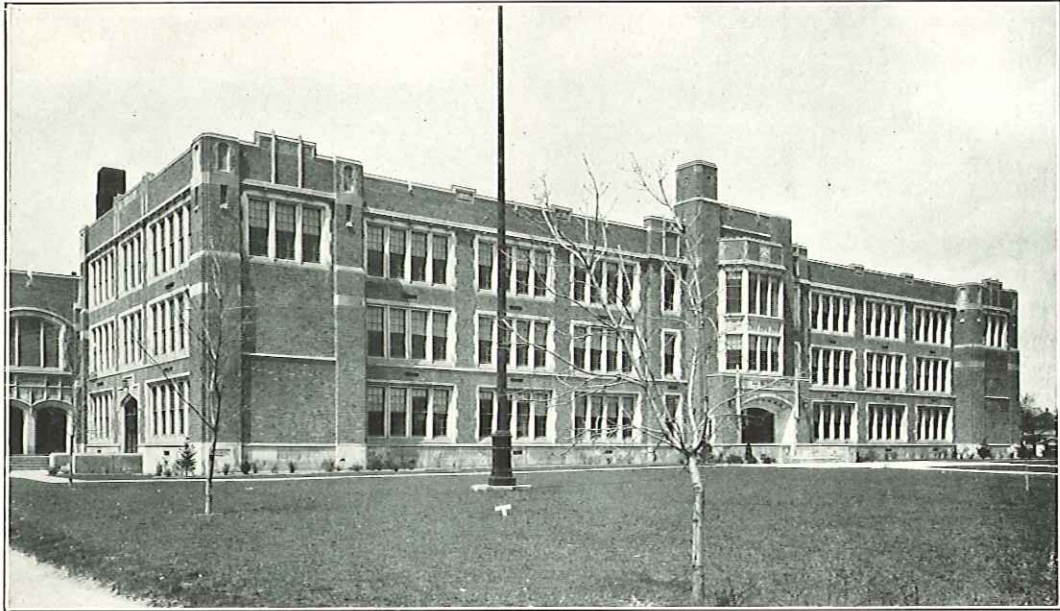

Our various grades of Bond and Writing Papers can be furnished in attractive typewriter boxes in sizes $8\frac{1}{2} \times 11$ and $8\frac{1}{2} \times 13$.

Secretary's Favorite

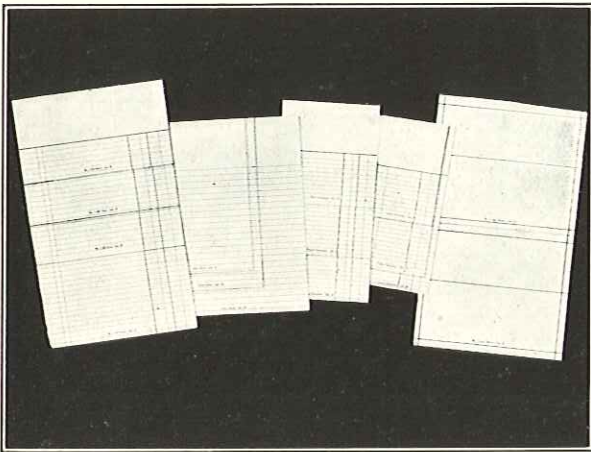

Second Sheets are used in large quantities. This lower priced grade is made in White only and is used by the large concerns, railroads, etc.

KVP SCHOOL PAPERS

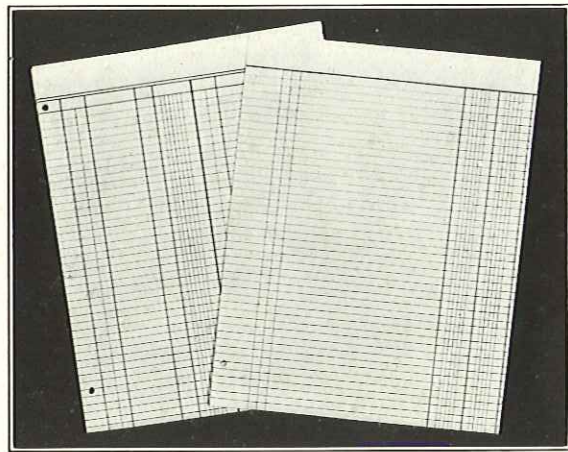

. . . Meet the Test of Modern Educational Requirements

GOOD workmanship in any line is dependent upon the ability of the workman and GOOD TOOLS. Inferior tools in the hands of an artist will cause his labors to fail. Students in our schools, colleges, and universities should be provided with materials which will justify their best endeavor. Paper is the most used and most essential "tool" a student has. It should, therefore, be of such quality and character as to inspire the highest type of effort and exhibit the achievement in the most attractive manner possible. Teachers and students in hundreds of schools have recognized the improvement in written work when done on KVP quality papers. Our papers are being specified by many leading educational institutions including the largest and finest colleges and universities the country over.

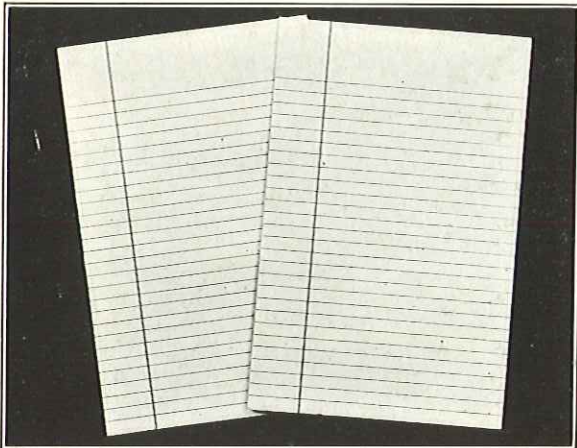

Ruled Headings and Legal Blanks

Printer's Ruled Headings and Legal Blank Forms constitute a very sizable portion of our ruled paper tonnage. Several machines are busy the year around producing this line. The grades used for these commercial forms are KVP Watermarked Bond, Glendale Bond, and Glendale Superfine. All of these grades are sized to present perfect printing surfaces. All KVP standard commercial forms are carried in stock for quick shipment.

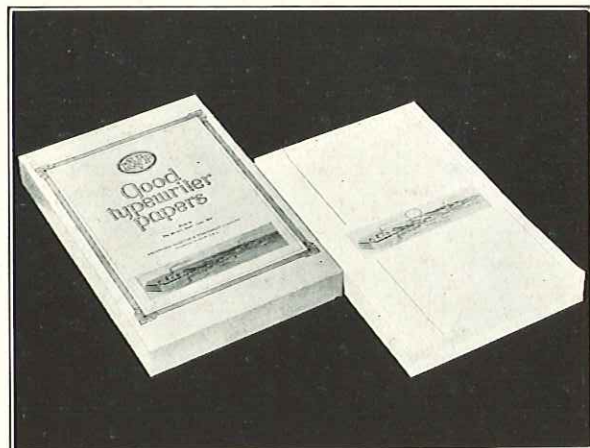

Journal and Ledger Forms

College and High School Commercial Departments and Business Colleges use large quantities of Journal and Ledger practice forms. KVP Writing, Bond and Ledger Papers are ruled to these forms as carefully and accurately as the highest priced rag stock used in actual commercial practice.

Canary Legal Ruled Pads

Stocked and sold by all the leading stationery and office supply stores. KVP Legal Ruled Pads are manufactured of our No. 1 Canary writing stock, Substance 16. A beautiful paper with a splendid writing finish and ruled to standard form. Pads are reinforced with cloth binding.

Boxed Typewriter Paper LEGAL RULED

KVP Bond and Glendale Bond ruled with single marginal lines and finished to the standard $8\frac{1}{2} \times 13$ size for the legal profession, put up in attractive boxes and carried in stock in three weights, light, medium and heavy.
